- **Internet Lab:**   TJMS

Description: The lab for the Internet is designed to give students more time to practice, implement and expand upon what they learned. Participants will be given the opportunity to refresh, upgrade or improve their knowledge, whether they took the class in the previous week, semester or year. There will be time to address specific issues. Lab size is limited so there can be personalized attention and questions can be answered. **If you have a certain project you want help with, please email Ms. Zahn prior to the class at roannzahn@sbcglobal.net so she can prepare. Prerequisite: Participants must have taken a previous Introduction to the Internet class.**
