

COVID-19 Student Illness Tool

Student _____ Date _____ School _____

Parent/Guardian _____ Phone _____

Comments:

Part 1

1. Has the student been diagnosed with COVID-19 by a health care provider in the last 10 days?
Yes No
2. Within the last 10 days, has the student tested positive for COVID-19 or completed testing and awaiting results? Yes No
3. Has the student experienced any of the following symptoms within the last 24 hours?
 - ◆Cough : Yes No
 - ◆New loss of sense of smell or taste : Yes No

STOP! If YES to any question in Part 1, the student should remain at home or be sent home immediately.

The student should isolate and his/her healthcare provider should be contacted for testing recommendations. If symptomatic (see #3), student will need to isolate through 10 days from symptom onset or obtain a negative COVID test from an accredited lab (over-the-counter at home tests not accepted).

Part 2

1. Has the student developed (new onset or above normal range for the individual) any of the following symptoms within the last 24 hours?
 - ◆Temperature at or above 100.4 Yes No
 - ◆Sore throat Yes No
 - ◆Headache Yes No
 - ◆Muscle/Body aches Yes No
 - ◆Unusual fatigue Yes No
 - ◆Nausea or vomiting* Yes No
 - ◆Diarrhea* Yes No
 - ◆Runny nose/Nasal congestion Yes No

If YES to 2 or MORE questions in Part 2, the students should remain home or be sent home immediately.

The student should isolate and his/her healthcare provider should be contacted for testing recommendations. If symptomatic (2 or more yes responses from Part 2), student will need to isolate through 10 days from symptom onset or obtain a negative COVID test from an accredited lab (over-the-counter at home tests not accepted)

If YES to 0 or 1 questions in Part 2, the student may attend school

For questions, assistance completing this form, or further information please contact the District Nurse, Abby Monroe at Abby.Monroe@pwssd.k12.wi.us or 262-268-6075.

*Vomiting or diarrhea – alone or together – will require the student to go/stay home. However, these symptoms do not necessarily indicate the need for COVID testing or isolation.
